

Oliver Brown

Product Manager, Play & Interactive Learning

oliver@oliverbrown.design · 413-588-8110 · Boston, MA

oliverbrown.design · linkedin.com/in/oliver--brown

Product manager pairing 11 years of classroom teaching with industry design leadership and a Harvard Ed.M. in EdTech. Led the design of 27 math learning games and a suite of 9 accessibility features across 3 products, reaching 2M+ K–12 students and 174,000+ educators in 7,400+ schools. I craft next-generation tools for playful learning.

SKILLS

Design - Cross-functional leadership · Product roadmapping, scoping, and prioritization · Design standards & best practices · Design mentorship · Stakeholder management · User-centered design · User research · Playtesting · Rapid & playable prototyping · AI-assisted prototyping

Learning - Experiential learning · Game-based learning · Project-based learning · Simulation design · Student-centered design · Curriculum development · Standards alignment · Learning objective design · Assessment design · Scaffolding & difficulty progression

Accessibility - Inclusive design · Accessibility feature design · Accessibility testing · Blind & low-vision support · WCAG compliance · Universal Design for Learning (UDL)

Tools - Claude Code · Adobe Creative Suite · Affinity Designer · Procreate · GameMaker · Unity · Python · C#

EXPERIENCE

Senior Interactive Learning Designer (Learning Games) | MIND Education *Oct 2021 – Jun 2026*
Accessibility Design Lead (functional role)

- **Game Design:** Led design of 27 math learning games across 3 EdTech products, managing internal and external stakeholders, coordinating cross-functional work across product, development, art, and curriculum teams, and conducting remote and on-site user testing in K–12 schools.
- **Product Management:** Contributed to the ground-up design of 2 new EdTech products and a full redesign of an existing product's platform, conducted a comprehensive standards audit across Common Core and Texas math standards, and used findings to develop a flexible games roadmap tool to maximize coverage gains.
- **Accessibility Design:** Spearheaded a cross-functional effort to build a suite of 9 new accessibility features across 2 products, conducted on-site testing with blind and low-vision learners, and supported an outside auditor's years-long remediation process.

- **Classroom Teaching:** Taught all core subjects across grades 2–5 for 11 years, building close relationships with students and families, managing lesson planning, scheduling, parent communication, school events and performances, and writing comprehensive narrative evaluations for every student twice yearly.
- **Learning Design:** Designed and iteratively refined project- and game-based learning experiences that cast students as doers, builders, and deciders within environments tightly designed around specific content and outcomes, including a design thinking unit where student teams built candle-powered airships, a town simulation covering municipal, economic, and political systems, a year-long forensics unit built around solving crimes staged around the school, and a school-wide election simulation with classes serving as election workers, press, and campaign teams.
- **School Leadership & Community:** Served as lead sex education teacher for grades 6–8 for 7 years, presenting at the National Sex Education Conference; led school-wide weekly sing-alongs on guitar and piano; co-founded the Justice, Equity, and Diversity Committee; and served on the Personnel Committee.

ADDITIONAL EXPERIENCE

Teaching Fellow | Harvard Graduate School of Education

Feb 2022 – Present

- **Teaching & Mentorship:** Taught “Digital Prototyping for Deeper Learning,” a graduate-level EdTech course at HGSE, for 4 spring semesters, mentoring students through the design and coding of EdTech prototypes, teaching in the classroom, providing ongoing feedback, and helping iteratively redesign the course based on observation and student feedback.

Learning Designer | MIT Playful Journey Lab

Spring 2021

Internship during graduate study at Harvard

- **Learning Design:** Supported neuroscience research on “Aquapressure,” a game-based assessment of executive function for elementary-age learners undergoing experimental validation. Designed supporting materials including a companion classroom game teaching students what executive function is and accompanying materials for a museum exhibit featuring the game.

EDUCATION

Ed.M., Technology, Innovation, and Education | Harvard Graduate School of Education

2021

B.A., Art | University of California San Diego

2002
